ANSWER KEY

Machine_Learning_Quiz_01

Course: CSC354 - Machine Learning

CLO-2 Apply supervised learning techniques to solve classification problems.

Q1. Explain how a decision tree algorithm can be used to classify emails as spam or not, and what are the main features it might consider?

Answer:

A Decision Tree uses recursive partitioning of data based on feature values. It considers characteristics like email content keywords (e.g., 'free', 'win'), sender'table_name','emailBody']
