MARKING RUBRIC

Programming_Fundamentals_Assignment_1

Course: CSC103 - Programming fundamental

Assessment-based marking guide with evaluation criteria

CLO-2 Employ basic programming constructs using a programming language.

Q1. Write a function to calculate the factorial of a given number.

Evaluation Criteria:

- **Algorithm/Approach (2 marks):**
  Correct algorithm or problem-solving approach
- **Code Correctness (2 marks):**
  Code produces correct output and handles edge cases
- **Logic & Efficiency (1 mark):**
  Logical flow and reasonable time/space complexity
- **Code Quality (1 mark):**
  Readable code with proper naming and structure

Expected Output: Verify code produces correct results for all test cases

Total: 5 marks
