Course Syllabus: Probability & Statistics for Data Science

Field	Details
Course Code	DS-001
Course Title	Probability & Statistics for Data Science
Department	Data Science
Course Description	This course introduces fundamental concepts of probability and statistics required for data science, including data interpretation, uncertainty modeling, and statistical decision-making techniques.

Course Learning Outcomes (CLOs)

CLO No.	Course Learning Outcome	Bloom's Level
CLO1	Define basic concepts of probability, random variables, and statistical measures	Remember (L1)
CLO2	Explain probability distributions and statistical inference methods	Understand (L2)
CLO3	Apply probability rules and statistical techniques to real datasets	Apply (L3)
CLO4	Analyze and interpret data using statistical tools for decision making	Analyze (L4)
